

Manas Workflow Chart

[A] Site execution

- A1** · Work planning — upcoming task to site task
- A2** · Material request — raise indent to purchase
- A3** · Site monitoring — daily progress, labour strength
- A4** · Execution breakdown — work completed, balance
- A5** · Material inventory — site stock updated via GRN

[B] Purchase

- B1** · Quote comparison — vendor quotes, comparative
- B2** · Management approval
- B3** · PO generation based on approval
- B4** · Procurement — send PO to vendors
- B5** · Delivery — material received on site
- B6** · Receipt verification — GRN updates site stock
- B7** · Invoice handling — vendor bill after site confirms
- B8** · Accounting handover — verified, sent to accounts

[C] Billing

- C1** · Measurement — site joint measurement
- C2** · Bill preparation — contractor submits bill
- C3** · Bill verification — Project Head and Project QS
- C4** · Management approval — QS Head, then HoD
- C5** · Final handover — to accounts for payment

Proposed Module Structure

Project & budget

- BOQ and project budget
- Contractor master — scope, rates, retention
- Work orders carrying agreed rates
- Budget vs actual, live by BOQ line

Site execution

- Site task planning
- Material indent against a work order
- Daily progress and labour strength
- Site stock, updated by GRN
- Work completed and balance

Purchase & stores

- Material master and supplier master
- Quote comparison and comparative statement
- Purchase approval
- PO generation and dispatch to vendor
- Material received and GRN
- Invoice verification — PO, GRN, bill
- Supplier ledger and returns
- Accounts handover

Billing & certification

- Joint measurement against BOQ lines
- Contractor bill submission
- Verification — Project Head and QS
- Approval — QS Head, then HoD
- Accounts handover for payment
